## Business Management

As a business owner, you need realtime specifics on your business performance. The ability to determine business metrics such as at a glance profitability will help guide you to make critical decisions for your business.

## Resource Tracking

Tracking elements of your enterprise; Employees, Vehicles, Tools and more provide you unparalleled realtime specifics on your business performance. Determine not only where a crew is located but also what they're doing.

## Advanced Reporting

Reports once meant loud clacking printers generating reams of paper. We don't need to kill trees to have a comprehensive view on your Enterprise Resources!

Creating the metrics is simple:

- ✓ Customers
- ✓ Crew
- ✓ Equipment
- ✓ Jobs
- ✓ Materials

## How it Works

**Customers:** We help you get more customers by providing integration to marketing platforms, data analysis and even people to help in your Customer Service.

**The Work:** We provide you unprecedented tracking of field crews, maintenance, warranty and returns (temporary fencing).

**The Billing and Maintenance:** We automatically provide you the option to integrate directly to QuickBooks. Never enter an invoice again!
